Air Quality Modeling: Theories, Methodologies, Computational Techniques, and Available Databases and Software – Volume IV is the fourth and last volume of a comprehensive book series on the subject of air pollution and computer modeling of air quality phenomena. The book series is available both on CD-ROM (see below) and as a [bound textbook](#) (search: OTHP-28). The book series is published by the [EnviroComp Institute](#) and the [Air and Waste Management Association](#).

For updates, corrections, and discussion, please visit:
<http://www.envirocomp.org/aqm>

The electronic book *Air Quality Modeling: Theories, Methodologies, Computational Techniques, and Available Databases and Software – Volume IV* is distributed on CD-ROM by the [EnviroComp Institute](#). This final Volume IV updates some chapters presented in previous volumes and provides discussion of new topics, including the coupling of meteorological and air quality modeling; the modeling of pesticide application, deposition and drift; ecological risk assessment from air toxics; health impacts and emission abatement strategies; ensemble predictions and data assimilation; and tracer studies. As a whole, the four volumes now provide a unique and comprehensive description of all technical topics related to air quality modeling. The book series also has its own Web page, <http://envirocomp.org/books/aqm.html>, which readers are encouraged to visit for additional information as well as to order copies of Volumes I – IV.

The electronic book is made of chapters organized in Adobe Acrobat's PDF files that can be examined using Adobe Acrobat Reader (which can be [freely downloaded](#)). The reader can use any computer platform (PC/Mac/Unix). Navigation is straightforward. The book is complete with hypertext links, references, website and email pointers, graphics, and information about chapter authors including curriculum vitae, biographies, and pictures. The Table of Contents of Volume IV and the Order Form are presented below.

Table of Contents – Volume IV¹

	Preface	xi
	About the Editor	xiii
	About the Publishers	xiii
	About the Chapter Authors	xiv
1	The Problem – Air Pollution	1
	1 Our Natural Environment	1
	2 Air Pollution, Some Definitions	3
	3 Primary and Secondary Pollutants	5
	4 A Short History of Air Pollution Modeling	6
	5 Air Pollution Modeling Guidelines	13
2	The Tool – Mathematical Modeling	21
	1 Why Air Quality Modeling	21
	2 Modeling Categorized	23
	3 Modeling the Atmosphere	29
	4 Modeling Alternatives	31
	5 Spatial and Temporal Scales	33
	6 Spatial and Temporal Resolution	34
	7 Uncertainty: Bias, Imprecision, and Variability	35
	8 Evaluation of Model Performance	37
	9 Data Needs	40
	10 Uses of Models	42
3	Emission Modeling and Inventory	47
4	Air Pollution Meteorology	49
5	Meteorological Modeling	51
5D	Recent Advances in the Similarity Theory of the Stable Boundary Layer	53
	1 Introduction	53
	2 Scaling Systems	54
	3 Empirical Verification	59
	4 Structure of Stable Turbulence	64

¹ The table of contents for Volumes I, II and III can be found in this book on pages 467, 471 and 475, respectively.

5E	Coupling Meteorological and Air Quality Models	73
1	Introduction	73
2	Meteorological Data	75
3	The Coupling	80
4	Examples of Coupling Processors	83
5	Sources of Data over the Internet	99
6	Plume Rise	107
7	Gaussian Plume Models	109
8	Gaussian Puff Modeling	111
9	Special Applications of Gaussian Models	113
1	Some Mathematical Properties of the Gaussian and Their Practical Implications	114
2	Gaussian Applications	118
3	Gaussian Regulatory Model Improvements	125
10	Eulerian Dispersion Models	131
11	Lagrangian Particle Models	133
12	Atmospheric Transformations	135
13	Deposition Phenomena	137
13A	Modeling of Pesticide Application, Deposition and Drift	139
1	Introduction	140
2	Sprayer Types	142
3	Ground Application	143
4	Aerial Application	147
5	Conclusions	155
14	Indoor Air Pollution Modeling	161
15	Modeling of Adverse Effects	163
15E	Ecological Risk Assessment for Air Toxics	165
1	Introduction	166
2	Site Characterization	169
3	Air Dispersion Modeling for Ecological Risk Assessment	188
4	Estimation of COPC Concentrations in Media	205
5	Ecological Risk Problem Formulation	232
6	Risk Analysis	257
7	Risk Characterization	278
	Conversion Factors	295
	List of Acronyms	295
	List of Variables	298
	Definitions	301

15F	Combined Assessment of Health Impacts and Emission Abatement Strategies	303
1	Introduction	304
2	Air Quality and Health: The Issue	305
3	Methodological Framework	306
4	Health Impact Assessment	308
5	Cost – Benefit Analysis	310
6	Uncertainties and Research Needs	311
7	Summary and Conclusions	312
16	Statistical Modeling	317
16C	Ensemble-Based Air Quality Predictions	319
1	Introduction	319
2	Ensemble Designs	322
3	Ensemble-Based Deterministic Predictions	332
4	Ensemble-Based Probabilistic Predictions	334
5	Spread-Skill Relationship	338
6	Post-Processing and Calibration	339
7	Ensembles Economic Values	341
17	Evaluation of Air Pollution Models	349
18	Regulatory Modeling	351
19	Case Studies	353
19A	Case Studies: Multi-Scale Air Pollution and Meteorological Modeling	355
1	Introduction	355
2	Case Studies	358
20	The Future of Air Pollution Modeling	371
21	Active Groups in Air Pollution Modeling	373
1	Introduction	374
2	Model Developers' Groups	376
3	Model Users' Groups	424
22	Available Software	435
23	Available Databases	437
24	Physical Modeling of Air Pollution	439

25	Measurement of Atmospheric Dispersion Using Gaseous Tracers	441
1	Introduction to Atmospheric Tracer Studies	441
2	Historical Perspective and Application of Atmospheric Tracers	442
3	Typical Components of a Tracer Study	443
4	Quality Assurance	452
5	Data Management Techniques for Tracer Studies	454
6	Applying Tracer Data to Validation of Model Performance	454
26	Air Quality Modeling: Pre-Processing and Post-Processing	459
27	Air Quality Modeling Resources on the Web – An Update	461
1	Introduction	461
2	Regulatory Issues	462
3	Books	463
4	Available Software	463
5	Dispersion Models	464
6	Photochemical Models	464
7	Receptor Models	465
8	Air Quality Forecast and Resources	465
9	Visibility Modeling	466
10	Courses Online	466
	Table of Contents – Volume I	467
	Table of Contents – Volume II	471
	Table of Contents – Volume III	475
	Authors’/Contributors’ Index for Volumes I – IV	479
	Subject Index for Volumes I – IV	483

Order Form

- YES, SEND ME ____ COPY (ies)** of *Air Quality Modeling: Theories, Methodologies, Computational Techniques, and Available Databases and Software – Volume IV ON CD-ROM, READABLE IN ANY COMPUTER PLATFORM (PC/MAC/UNIX).*
- Send me all 4 AQM volumes on CD-ROM with a 15% discount: US\$ 371.00 (add US \$10 for handling/shipping outside the US; add 9.75% in California = US\$ 407.17)**
- I ENCLOSE A CHECK OR MONEY ORDER IN US DOLLARS** (US\$ 109 per CD-ROM; add US\$ 10 per order for handling/shipping outside the US; add 9.75% in California = US\$ 119.63 per CD-ROM). **MAKE CHECK PAYABLE TO EnviroComp Institute.**
- CHARGE MY CREDIT CARD** (US\$ 109 per CD-ROM; add US \$10 per order for handling/shipping outside the US; add 9.75% in California = US\$ 119.63 per CD-ROM):

Card (circle one): **VISA MC - Card number:** _____

Extra digits: _____ (IMPORTANT: you must include the 3 or 4 extra digits or card code which are generally found near the signature strip on the back of the card)

Card Expiration Date: _____ **Total charge: US\$** _____

Name as printed in the Card _____

Signature: _____

Deliver CD-ROM to:

Name/Organization: _____

Address: _____

Phone/Fax/E-mail: _____

Complete the order above and return by mail/fax/email to:

**The EnviroComp Institute
